GLENLANDS FARM

SHEEPMASHER SHEDDING SHEEP

Third annual sale

39 SELECTED TWO-TOOTH RAMS

50 SELECTED TWO-TOOTH EWES

WELCOME

Welcome to Glenlands Farm SheepMaster 3rd Annual two-tooth Ram Sale. We're proud of how this year's line-up has come through another tough season. The rams were weaned early last November onto very short covers, yet they've grown out well.

A strong feature of this line-up is the high number of rams born to hoggets. Our ewe hoggets performed extremely well, producing tidy, vigorous lambs at docking last November.

This year we have a small group of two-tooths lambing out of season. We're still refining how best to feed and manage them for late-winter mating, and we're looking forward to having lambs on the ground around New Year.

Enjoy browsing through this year's great line-up of two-tooth Rams.

Dean and Antoinette Martin

RAM AUCTION AT GLENLANDS SHEEPMASTER STUD

50 2th Ewes will also be available unless sold prior

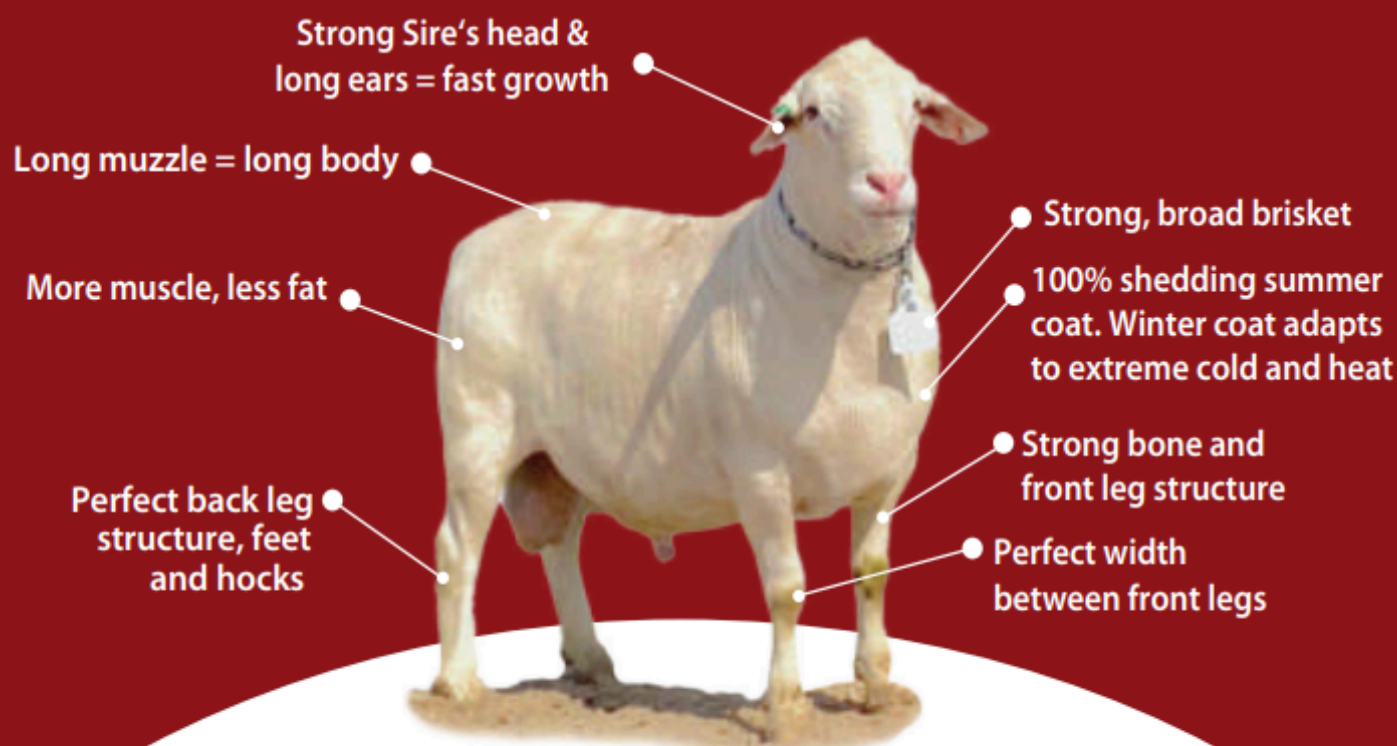

Gates open 12pm – Auction 2pm 27th November 2025

1330 State Highway 5, Glengarry, Napier

What makes a SheepMaster?

Sustainability

Profitability

SILKY 100% SHEDDING

- Fertility
- Feet – walkability
- Productivity
- Easy manage
- Early maturity
- Drought tolerant
- Hardy, tick resistant
- Productive all regions
- Aseasonal

No shearing | No crutching | No tailing | No flies

Reference sires

We have purchased semen from the following SheepMaster sires to contribute to our breeding program. We have been using AI since 2022, and have rams from Apollo and Monarch for sale this year (either as the sire, grandsire, or great-grandsire). We have recently also purchased Masterbuild, who was used for AI this year, and will have sons available next year.

Apollo

Apollo (left) was the first sire purchased from the SheepMaster stud in Australia. Progeny from Apollo have displayed great post weaning growth and carcass weights, as well as low dag scores.

Monarch

Monarch (right) was the second sire purchased from the SheepMaster stud in Australia. Progeny from Monarch have displayed great weaning weights, lamb survival and resistance to worms.

Masterbuild

Masterbuild (left) is the third sire purchased from the SheepMaster stud in Australia. We are seeing the first progeny born to this ram this year, and are currently impressed with their growth to date. We look forward to following these lambs into next year.

Understanding the SIL information

Sil job number - 42818 - 7/11/2025

Glenlands SheepMaster flock 7707

Raw data

All raw data is presented with dates collected. Note that ram hoggets used as sires had their autumn live weight taken pre-mating (highlighted).

BR - birth rank

% SheepMaster - percentage of the genetics tracing back to an AI sire

WWT - the weaning weight of the lamb

LW6/8 - the autumn live weight of the lamb

LW12 - the live weight of the ram at 12 months of age

SHEDLB - shedding score as a lamb

SHEDMA - shedding score at 12 months of age

FEC1 - Faecal Egg Count prior to 1st March

Breeding values

The breeding values are calculated based on raw data from an individual and his relations. They represent the genetic merit of an individual for a trait, that can be passed on to the next generation. Breeding values in this catalogue include:

WWTbv - Weaning weight

LW8bv - Autumn weight (8 months)

NLBbv - Number of lambs

SURbv - Lamb survival

BCSbv - Body condition score

SHEDbv - shedding bv - Note that this is an experimental BV released once-yearly by AgResearch, and not part of the weekly SIL GE run

Indexes

Indexes combine multiple breeding values with their relative economic values to give the total value for a goal trait.

New Zealand Maternal Worth

$$\text{NZMW} = (-158 * \text{EWTbv}) + (\text{DPCR}) + (153 * \text{WWTbv} + 145 * \text{WWTMbv} + 480 * \text{CWbv}) + (16049 * \text{SURbv} + 15008 * \text{SURMbv})$$

Dual purpose FEC

$$\text{DPF} = -6.8 * \text{FEC1bv} - 6.8 * \text{FEC2bv} - 5.2 * \text{AFECbv}$$

Dual purpose Dag

$$\text{DPD} = -64 * \text{LDAGbv} - 64 * \text{ADAGbv}$$

We rely on neXtgen Agri as a critical consultant in our journey to improving flock genetics. They enter all our data into SIL, guide our selection decisions, and provide expertise that underpins our breeding program.

Much of the information on breeding values and trait selection is drawn from their guide, Your Guide to Buying the Right Rams, which has been invaluable to us.

neXtgen Agri is a consulting company specialising in genetics and breeding, helping stud breeders and commercial farmers to optimise their sheep and beef breeding operations. Our motto, "farming in our hearts, science in our heads" incorporates our drive to breed the best animals for your farming situation. We are passionate people, working with passionate farmers to achieve their goals. Working with seedstock producers to breed animals with the best potential for genetic progress, and working with producers to maximise production while reducing costs through genetic selection. Recently, we have produced a ram buying guide for maternal and terminal farmers in New Zealand to help them make the most informed ram buying decisions they can. A QR code link to the guide is below. This is free to download, but if you would prefer a hard copy, please pay postage to get one delivered.

We have been working with Glenlands farm for about 18 months now, working as their bureau (entering stud data into SIL), giving overall breeding program insight, helping to manage the coordination of measurement, and selecting ewes and rams on data and visual assessments. This year we have also implemented a program to use DNA parentage in the Glenlands flock, with the prospect of being able to utilise genomic breeding values in the near future. Using DNA to determine parentage gives a more accurate sire and dam allocation, improving the accuracy of pedigree and breeding value information. Animals are also tested for a series of genetic markers, including double muscling and increased fertility.

The SheepMaster are a shedding breed, with great maternal attributes, a focus on structure and their ability to produce lambs with great meat and growth. At Glenlands, shedding is a top priority, as are growth and reproduction. Glenlands have been recording FEC (faecal egg counts) on their lambs, to generate a breeding value for better worm resistance. They are also trying to establish a practical out of season breeding protocol.

Dean and Antoinette are passionate about the sheep that they are breeding, to provide a series of great sires to commercial clients. It is a pleasure to work with them to help breed these rams.

Conditions of sale

The New Zealand Stock & Station Agent's Association Conditions of Sale and, to the extent deemed relevant by PGW Wrightson Limited (PGW), PGW's Terms of Sale apply to this sale. When proceeds are credited or a purchase is debited to a PGW monthly credit account, then PGW's Monthly Account Terms of Trade (as amended from time to time) apply to the extent deemed relevant by PGW. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of PGW's Terms of Sale and Monthly Account Terms of Trade are also available online at:
www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions or in hardcopy on request.

Finance terms are strictly cash prior to delivery unless credit arrangements have been made with the Auctioneer prior to sale.

Although every care has been taken to ensure the accuracy of the information contained in this catalogue, no responsibility is accepted for any error or omission that might be contained herein.

All intending purchasers must register at the sales office prior to the sale.

All sale prices are GST exclusive.

Each lot becomes the purchaser's responsibility at the fall of the hammer.

PGW will pay a purchasing rebate at a negotiated 6 % figure of the purchase price excluding GST, plus GST, to livestock companies & recognised independent livestock agents with a PGW account who have introduced buyers to PGW before the sale and/or accompanied buyers to the sale.

Health and Safety

Under OSH regulations, all visitors must take care and responsibility on sale day for their own safety. Potential hazards include (but not limited to) stock movement, moving vehicles and machinery, and uneven surfaces in and around the sheep yard.

Fertility

All rams have been palpated by a veterinarian and accredited Brucellosis free, and free of other abnormalities.

Insurance

All purchases can be insured for transit or longer periods through the Auctioneer.

Transport

Lots may be left on farm at the purchaser's risk until suitable transport is arranged. Please leave full and explicit instructions in regard to any transport.

Two-tooth Ewes

We are offering up a selection of two tooth ewes in multiple lots. These ewes have lineage to Monarch and/or Apollo. All ewes are at least 25% Sheep Master, with some having 50% SheepMaster in their genetics.

The averages of the data for all ewes is presented below. Some of these ewes were born to hoggets, so actual weaning weights have been presented separately, with average weaning dates.
